

LLM

Bagel - <https://bagel-ai.org/>

open-source LLMs / multimodal models (like **CogVLM2, OpenFlamingo, LLaVA,**

Model	GitHub / Open Source?	What you get
CogVLM2	Yes — https://github.com/zai-org/CogVLM2 (GitHub)	Full code + demos + inference API examples

Model	GitHub / Open Source?	What you get
OpenFlamingo	Yes — https://github.com/mlfoundations/open_flamingo (GitHub)	Code & training/eval framework
LLaVA	Yes — https://github.com/haotian-liu/LLaVA (GitHub)	Code + model + examples

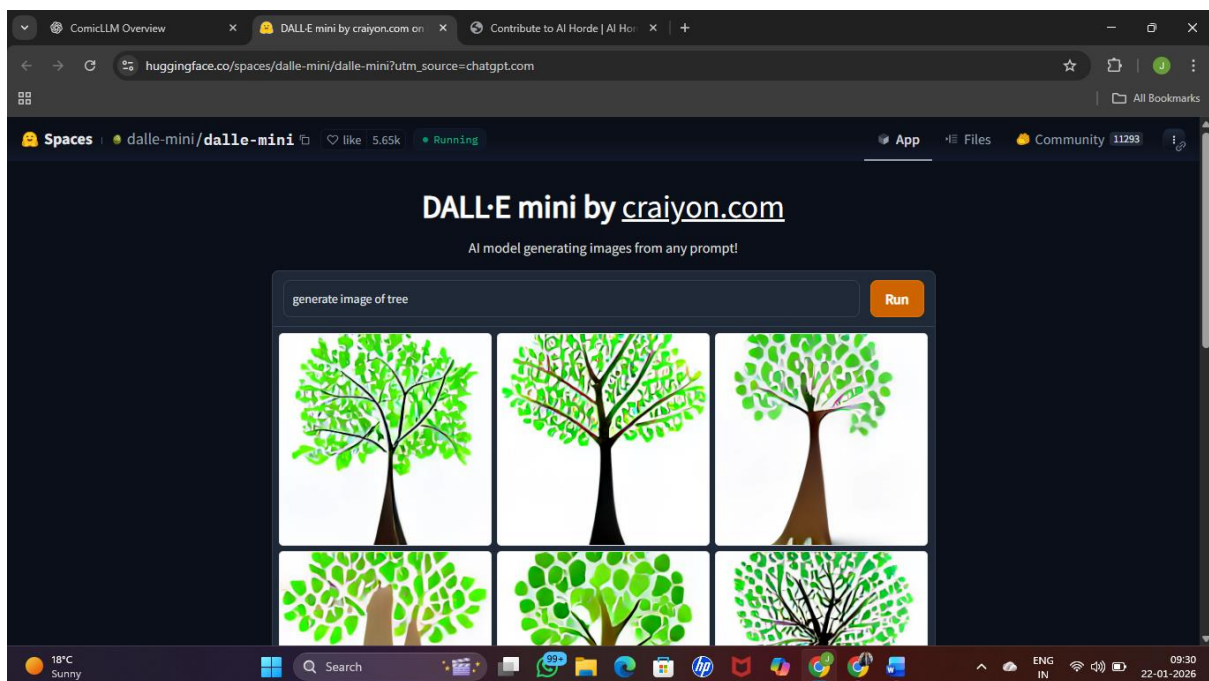

download the code (usually from GitHub), download the model weights, and then run it on your system or a cloud GPU.

Craiyon

Craiyon is a **text-to-image** image generator

<https://www.craiyon.com/en>

<https://stablehorde.net/contribute/joining>

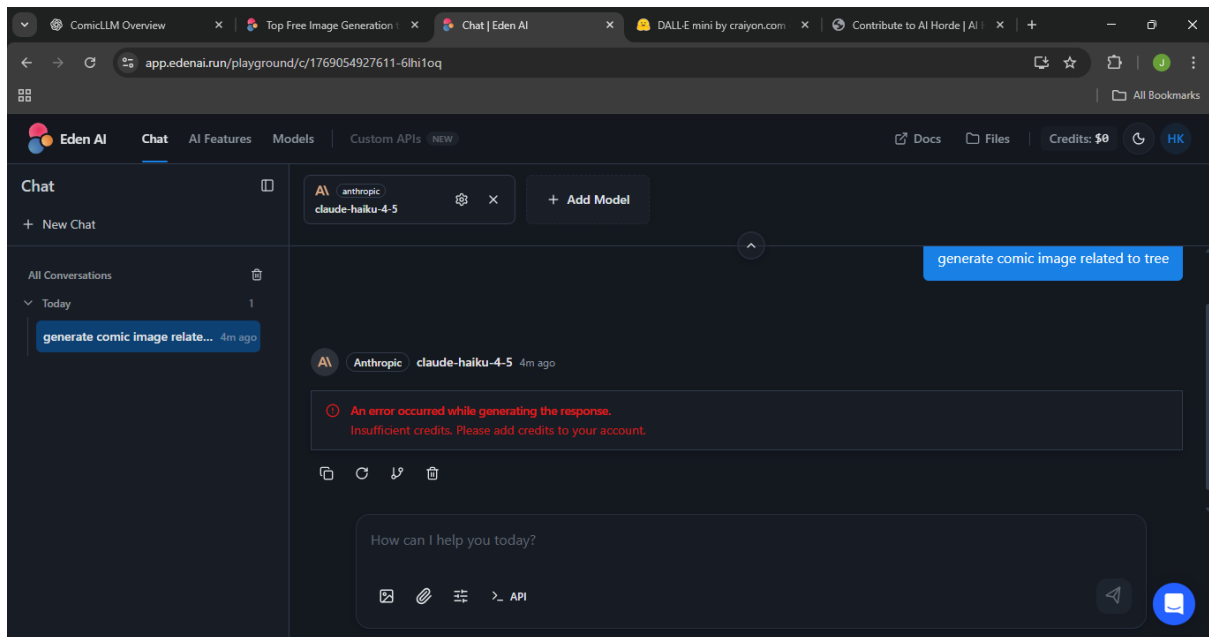

<https://huggingface.co/spaces/dalle-mini/dalle-mini>

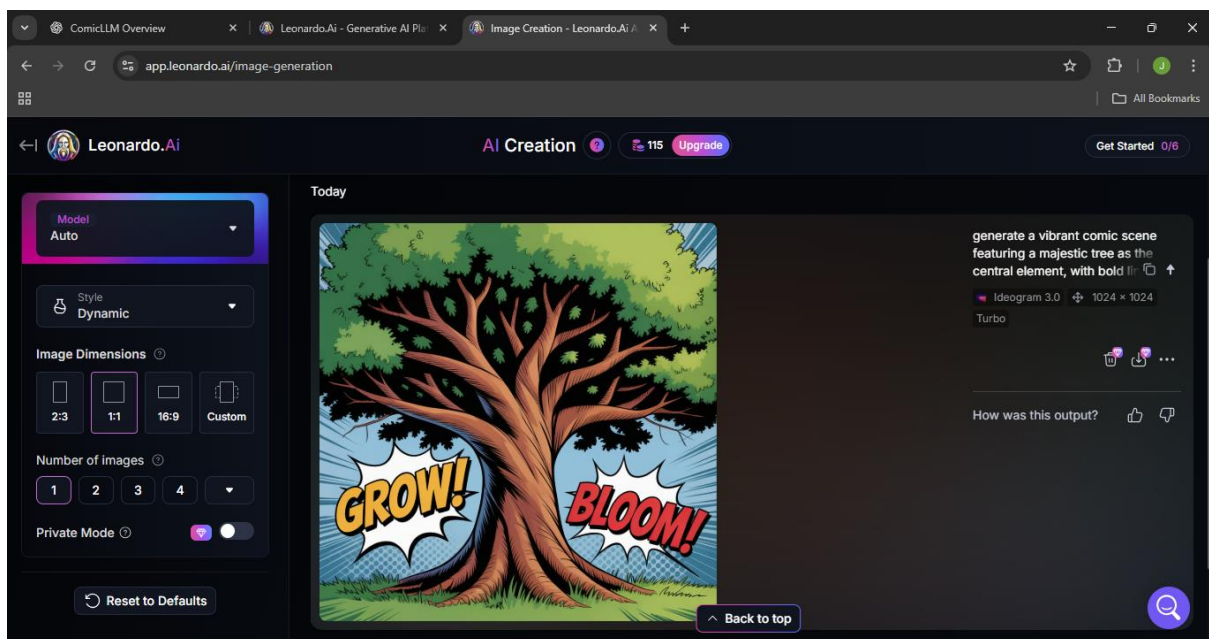

paid:

<https://github.com/LlamaGenAI/LlamaGen?>

Item	Open Source?	Hosted API	Notes
Comic-Diffusion (HF)	Yes	(often via HF Inference)	Comic image model
RetroComicFlux (HF)	Yes	(via HF/third-party)	Vintage comic style
Flux1.ai	No(platform)	Yes	Hosted generator service
Comicfx (AIBase)	Yes	No (self-host)	Comic LoRA model
FLUX-2 LoRA at fal.ai	Partial	Yes	Commercial API
StableDiffusionWeb.com	No (UI)	No	Browser tool only
LlamaGenAI (GitHub)	Yes	Partial (enterprise)	API + framework

✓ Open Source / Community-usable

1. Bagel – <https://bagel-ai.org/> »
 - Open-source LLMs / multimodal models.
 - You can download the code and model weights (usually via GitHub) and run locally or on cloud GPUs.
2. CogVLM2, OpenFlamingo, LLaVA
 - These are examples of open-source multimodal models.
 - They require downloading code and weights from GitHub or Hugging Face.
3. Craiyon – <https://www.craiyon.com/en> »
 - The website itself is free to use.
 - Also integrates with Stable Horde (<https://stablehorde.net/contribute/joining> »), which is open source and community-run.
4. Hugging Face DALL-E Mini / Craiyon Space – <https://huggingface.co/spaces/dalle-mini/dalle-mini> »
 - Hugging Face Spaces are open source if the model authors share the repo.
 - DALL-E Mini / Craiyon's code is publicly accessible.
5. AI Comic Factory – <https://huggingface.co/spaces/jbilicke-hf/ai-comic-factory> »
 - Hugging Face Space. Open source if you access the underlying repo.

✗ Likely Paid / Not Open Source

1. ComicLLM – <https://comicllm.com/> »
 - Web app, requires subscription. Not open source.
2. Leonardo.ai – <https://leonardo.ai/> »
 - Proprietary, paid features. Not open source.
3. Playground.com – <https://playground.com/> »
 - Paid platform. Closed source.
4. Bing Image Creator – <https://www.bing.com/images/create> »
 - Proprietary Microsoft tool. Not open source.
5. EdenAI Playground – <https://app.edenai.run/playground/c> »
 - Paid API platform. Closed source.
6. Comic-AI – <https://comic-ai.ai/> »
 - Proprietary web app, not open source.

Tool / Model	Images per Prompt / Batch	Efficiency / Speed	Paid / Free	Approx Monthly Cost	Notes
